PREFACE

This publication is the fifth in a continuing series designed to bring under bibliographic control manuscript collections housed permanently in American repositories that are regularly open to scholars. The volume reports 2,020 collections located in 177 repositories. It brings the total number of collections described to 18,417, representing holdings in 616 repositories. The indexes in this volume cumulate the information published in the indexes of the two previous volumes, that is, they cover the 1963-66 catalog entries. The general index gives approximately 88,400 references to an estimated 45,600 subjects and places, 29,200 personal names, and 13,600 corporate bodies, i. e., business firms, churches, organizations, governments, and government agencies. The repository index enumerates by name of organization holding them the 6,092 collections.

The catalog entries are prepared from reports submitted by the repositories holding the manuscript collections. In this volume reports from 126 repositories, including some in Montana and Wyoming, are presented for the first time. It is gratifying to note that now all 50 States, the District of Columbia, and the Canal Zone are represented by one or more repositories. As the coverage of repositories and collections continues to expand the value of the catalog to the scholarly world is increasingly recognized. Without the enthusiastic participation of the repositories, often reporting under extremely difficult conditions, it would be impossible to carry on this program. We are grateful to them for their support and we shall endeavor to improve the program and to strive for comprehensive coverage.

INTRODUCTION

History. Scholars, particularly in the field of American history, were instrumental in urging the establishment of a center for locating, recording, and publicizing the holdings of manuscript collections available for research. They had long been frustrated by the difficulties of locating specific manuscripts and even of identifying repositories that may contain source materials.

In 1951 the Library of Congress began to prepare actively for a National Union Catalog of Manuscript Collections to parallel its catalogs of printed works but it was not until 1958 that the Library could begin to realize its plans. On November 29 of that year the Council on Library Resources, Inc., made a grant of \$200,000 to underwrite the primary costs of the project. It later made supplemental grants amounting to \$170,565 to continue the work to July 1964, when Congress appropriated funds to carry the program as part of the Library's work.

In 1959 the Manuscripts Section was established in the Descriptive Cataloging Division with responsibility for creating and conducting the program of the NUCMC. An advisory committee of nationally prominent scholars representing learned societies and other groups concerned with the preservation and control of manuscripts was appointed and continues to assist in the formulation of broad policies. An intramural committee on manuscript cataloging was reassembled and is called upon as occasion demands to guide the practical application of policies. Reports were soon being gathered from repositories all over the country and the first card in the new manuscript series was printed in June 1959, visible evidence that the project was under way.

Early in the operation of the program it was recognized that maintenance of a card file in the Library of Congress would not adequately meet the needs of scholars. The plan was

enlarged to encompass the publication of the catalog using the printed cards as the text of the entries, arranging them in card-number sequence, and indexing them.

The first volume was published in the fall of 1962. It describes 7,296 manuscript collections located in nearly 400 repositories in the United States, reproduced from catalog cards printed by the Library of Congress in 1959, 1960, and 1961. Entitled *The National Union Catalog of Manuscript Collections, 1959-1961*, it was published by and is obtainable from J. W. Edwards, Publisher, Inc., Ann Arbor, Mich. As work progressed on the second volume, it was decided to replace the separate name and subject indexes of the first volume with a combined index for the two volumes. Thus in the spring of 1964 a two-volume set was published by the Shoe String Press, Inc., Hamden, Conn. One volume reproduces catalog cards printed in 1962 covering 5,028 collections in 208 repositories; the other contains an index in one alphabet to names, subjects, and places in the entries prepared from 1959 through 1962.

The third catalog, published after the program came under the full aegis of the Library of Congress, bears the Government imprint and is available from the Card Division of the Library. It covers the cataloging years of 1963 and 1964, has 2,051 entries representing collections in 98 repositories, and has a self-contained index. The fourth volume, for 1965, was the first of a projected series of annual volumes, each of which would cumulate the indexes with those of the preceding volume. Thus the latest indexes serve as a complete guide to all catalogs back to the cumulated 1959-1962 indexes.

Pattern and Scope. The holdings of manuscripts in the United States are so extensive that only by describing them in groups, rather than singly, can the project hope to cover them. As the intent of the catalog is to bring scholars and manuscripts together, only those collections are

described that are located in public or quasi-public repositories that regularly admit researchers.

There are no limitations on the time, place of origin, or nature of the collections recorded, but qualifying repositories are asked to report material conforming to the following criteria:

1. A collection is defined as a large group of papers (manuscript or typescript, originals or copies, of letters, memoranda, diaries, accounts, logbooks, drafts, and the like, including associated printed or near-print materials) usually having a common source and formed by or around an individual, a family, or a corporate entity, or devoted to a single theme. Small groups consisting of only a few pieces should not be reported as collections in themselves but should be included in more comprehensive reports covering many such groups, either by an entry under an appropriate theme if possible, or by a general entry for the miscellaneous (residual) collections of the repository.

2. Private manuscripts in archival repositories and archival records found outside the normal archival repository should be reported but not archives located where one might expect to find them, as, for example, county records in a county courthouse.

3. Collections consisting entirely of photocopies and transcripts of original manuscripts are admissible when they are created from original manuscripts scattered in several repositories or from several collections within a repository, or when the repositories holding the originals either do not regularly admit researchers or are not located in the United States.

Sources of Information. The information about the collections comes from various sources: data sheets especially prepared by the repositories, copies of their catalog cards, and entries in published guides to their holdings. Since the time available for cataloging manuscripts varies from institution to institution, the descriptions differ with respect to completeness and detail. Moreover, the total holdings

of large repositories may not always be reported completely, and the collections of some are not represented at all. These variations are inevitable in a project that depends on the cooperation of many people and organizations, all with limitations on their resources, to obtain the necessary data.

Catalog Entries. The staff of the Manuscripts Section of the Descriptive Cataloging Division prepares catalog entries from the information furnished by the repositories, accepting the reports as submitted but providing certain basic editing. It excludes those that fail to meet the specifications described above, or, with the consent of the holding institution, regroups collections to meet requirements.

The catalog entries have been prepared according to the *Rules for Descriptive Cataloging in the Library of Congress: Manuscripts, Preprint of the Rules for Collections of Manuscripts* (Preliminary edition, September 1954). This out-of-print edition and its unpublished revision prepared in 1965 are now incorporated in the *Anglo-American Cataloging Rules* (American Library Association, 1967). As the rules for manuscript collections are based on standard rules for author and title entry and description, the entries resemble those for published materials. The elements are as follows:

1. *Main entry.* a) The name of a person, family, or corporate body around which a collection is formed if it contains material written by or addressed to the person, family, or body. b) The name of a personal collector if his name appears in the name of the collection. c) If neither of these choices is appropriate the collection is entered under title.

2. *Title.* The name by which the collection is known or a brief title supplied by the cataloger; inclusive dates of the manuscripts are given.

3. *Physical description.* Given in terms of items, linear feet of shelf space, reels or feet of microfilm, or in other suitable terms. Notation is made of the form of the manuscripts if they are not original.

4. *Location.* The name of the repository where the collection is housed.

5. *Scope and content.* A description of the types and groups of papers and documents in the collection, noting their subject matter, the names of the principal persons and corporate bodies with whom they deal, and other special features of the collection. For personal papers, the note includes identifying biographical data.

6. *Other information (when available).* References to published and unpublished descriptions of the collection when they contain additional information; restrictions on access; literary rights; and provenance.

7. *Identifying number.* The number assigned to entries when they are printed on cards at the Library of Congress. It consists of the symbol MS, the last two digits of the year in which the entry was printed, and a serial number.

Entry Arrangement. In the first and second volumes of the catalog (1959-1961 and 1962), the arrangement of entries was determined entirely by the continuous numbers assigned to the various entries as they went to the printer. Beginning with the 1963 entries it has been possible to send fairly large groups of entries to the printer arranged alphabetically by repository, and under each repository by collection. This permits a degree of recognizable arrangement, which the reader can use advantageously through the Guide to Entries by Repository found in the front of the 1963-64 and later volumes.

Card Printing. Although the entries containing the information described above are printed on 3 x 5 inch cards in the Library of Congress MS card series, they are not for sale and the cards are not filed in the Library's card catalogs. Publication of the catalog with its comprehensive index obviates the need for a public card file. A main entry card catalog is maintained in the Manuscripts Section, as is a file arranged by repository. Cards are printed

for photoreproduction in book form, for staff use in preparing the index, for its working files, and for complimentary distribution to the repository furnishing the description. The Card Division of the Library of Congress preserves a master copy.

Information Received After Publication.

When additions to a collection change its character or include material that would have been indexed if it had been in the original description of the collection, the additions are cataloged as a supplement to the collection. Entries 64-1141 and 66-235 illustrate the form adopted.

Corrections or adjustments of errors obviously cannot be made to published entries but they can sometimes be remedied by changes in the next cumulated index. The misspelling of a name, for example, the attribution of an action to the wrong person, the mistaken location of an event, or the like, can be corrected in the index. When an entry is considered completely misleading, all references to it are omitted from the cumulated index.

Repository Index. This is an alphabetical list of the manuscript repositories with holdings presented in the catalog, followed in each case by an alphabetical list showing the main entry, title, and entry number of the collections which are fully described in the main part of the catalog.

Index. This index provides in one alphabet references to the names, places, subjects, and named historical periods reported in the catalog entries. Citations lead to the identification numbers that appear with each entry. Numbers are underscored when they represent main entries, or the names or subjects about which major portions of collections are formed.

1. *Names.* The index names all persons, families, and corporate entities, i. e., associations, institutions, business firms, governmental agencies, etc., associated with the various manuscripts. The nature of their association varies

from case to case. Some are authors, some subjects, some addressees, while others are involved more tangentially. Inspection of the entry for the appropriate collection will generally clarify the relationship.

Personal names are entered according to the forms prescribed in the *A. L. A. Cataloging Rules for Author and Title Entries*, 2d ed., Chicago, 1949, with references from the forms not adopted. (The index also follows these rules in the matter of capitalization, notably in titles of newspapers, books, and periodicals, where only initial and proper words are given initial capitals. As a matter of style, however, each filing word in the index is capitalized in full.)

Family names are indexed by surname followed by the word family. The names of corporate bodies are entered in as many forms as may be useful, e. g., name, key word, and location.

2. *Persons.* Similar personal names have been studied and the individuals identified as far as possible by the use of vital dates, place of residence, or occupation; unresolved conflicts of identity resulting from similar names are indicated by asterisks before the names or the citation numbers. For example, *Holmes, Nathaniel (63-378), could not be identified with the Nathaniel Holmes, 1815-1901, listed in the *Dictionary of American Biography*, or the Nathaniel Holmes listed in the first volume of this catalog (60-1750). Since little is known about the persons designated by asterisks, it is possible that two or more citations following such names may refer to more than one person. An asterisk preceding a particular citation number means that it may not belong to the person under whose name it is listed; for example, the number *64-1290 after Holmes, Oliver Wendell, 1841-1935, may properly refer to Oliver Wendell Holmes, 1809-1894. Users of this index will often have the special knowledge required to resolve such uncertainties.

Descriptions that refer only to material about the estate of a deceased person are indicated

under the person's name by the phrase *Estate of*; however, if the collection also contains other material, the estate is not singled out. The same system applies to the indexing of genealogical material under the name of a family, but genealogists can discover all genealogical material listed by family name under the direct entry GENEALOGY.

3. *Places.* Historical research in this country is so frequently concerned with study of the places where persons lived or where events occurred that geographic indexing of manuscript material is imperative. From the beginning an index entry has been made for each place name (city, village, or county) and another for the State in which it is located. Entries under local places are modified by the subjects or topics with which the respective manuscript collections or parts of them appear to deal. Many descriptions do not report specific subjects pertaining to places, and in such instances place names have been subdivided by such general phrases as *Family papers*, *Personal papers* (i. e., of the individual), *Letters from*, *Letters received in*, or *Resident of*.

Every collection with material relating to a State or region has been indexed under the name of that political jurisdiction or area, whether or not it has also been indexed under a local place name. The names of these larger jurisdictions and areas have been subdivided by subject and topical terms which are often, though not necessarily, the same as those chosen for direct subject entries; and by such subjects as *Economic conditions*, *History*, *Politics*, *Social life*, and *Travel and description*, and such forms as *Accounts* and *Legal documents*, which, by their nature, are not appropriate as direct entries.

Citations to the three cities of Boston, New York, and Philadelphia are not repeated under their respective State names. For example, PHILADELPHIA—*Schools* is repeated as SCHOOLS — *Pennsylvania*, but not as PENNSYLVANIA — *Schools*. Under PENNSYLVANIA—*Schools* will be found references to

schools in all places in that State except Philadelphia.

4. *Subjects.* Subject and topical index entries have been chosen to describe as accurately as possible the contents of the various collections. Words and phrases that have several meanings have been explained briefly; note, for example, the explanations under FISH TRADE and FISHERIES. "See" and "see also" references are freely provided to lead the user to related entries.

Subjects are usually subdivided by names of countries, States, or regions and are repeated as subheadings under the names of these countries, States, and regions. In many instances this pattern forms a double or reverse likeness, but, whenever it has been possible to present an extra dimension in an entry or in the subdivisions by changing wording, by using chronology, or by other appropriate devices, the reverse image has been broken. For example, the index entry MERCHANTS is divided chronologically and geographically, while as a subdivision under a place it is unmodified.

Such subject phrases as RURAL SOCIOLOGY have often been entered in both direct and inverted form, i. e., RURAL SOCIOLOGY and SOCIOLOGY, RURAL. If, however, there are many citations or subdivisions, one element is selected for the index entry and a "see" cross reference is made from the other. "See" references are made also from some synonyms, while, on occasion, citations appear under both terms.

Occupations and career activities are indexed if they appear to be the subjects of the writings. In the catalog entries the relationship between the note about the author and the description of the content of the collection is frequently so obscure that much valuable material may have been omitted from the index because the indexers could not assume that the material bears on the profession or occupation of the author.

5. *Specificity.* The words used are often those current in the period covered by the manuscripts, e. g., both LAND—*Companies* and REAL ESTATE BUSINESS OF PERSIA and IRAN, with

citations appropriate to each and cross references between them.

Most of the manuscripts reported in the catalog relate to the United States; consequently index entry words assume that relationship and begin with the significant subject word, e. g., REVOLUTION, not "American revolution," nor UNITED STATES—*Revolution*. Names of other countries are specified as required. Because of their applicability to almost every manuscript collection, the general topics "History," "Politics," "Economic conditions," and "Social life" are never used as main entries nor even as subdivisions under UNITED STATES. They are used under local place and State. The heading UNITED STATES is used only for official agencies of the Federal Government and for specific topics as they apply to the country as a whole.

The forms of manuscripts are rarely used as index entries although they are frequently given as amplification of subjects, names, or places, e. g., SHIPS—*Logbooks*, BOTANY—*Lectures*, LINCOLN, ABRAHAM—*Newspaper clippings*, MIDDLESEX CO., VA.—*County records*.

Chronology has been used to break up long lists of citations under some index entries. Of necessity, the time periods indicated are usually the inclusive dates of the collection and serve only as a general guide.

The catalog and its index are an aid to research, not a ready reference guide. Accordingly, investigators should search for both specific and general terms because both are used in the descriptions and general terms are presumptive clues to specific material.

Filing Arrangement. When the same name appears in the index as a personal name and as a place, family, or other name, the personal name precedes all of the others. Personal names are grouped together, followed by all other main index entries arranged alphabetically word by word without regard for punctuation. "Mc" is filed as if spelled Mac, and abbreviations are filed as if spelled in full, e. g., "Co." as County, "St." as Saint, "Ste" as Sainte,

"Mo." as Missouri. Subdivisions of a given entry are alphabetized in two groups: 1) subject terms, 2) States and countries. On occasion other subgroupings that will be obvious to the user have been made.

Example :

CHATFIELD, Andrew
CHATFIELD (L. W.) and Sons, firm
CHATFIELD, Louis
CHATFIELD-TAYLOR, Hobart
CHATFIELD, Ala.
 Dry goods business
 Personal papers
CHATFIELD and Brown, inc.
CHATFIELD Co., Miss.
CHATFIELD family.
CHATFIELD, Minn.
CHATFIELD (Ship)
CHEESE industry and trade
 Shipping
 New York
 Wisconsin

A few topics have been given special treatment because of the extent of the entries under them, e. g., "Civil War," "Genealogy," "Michigan," and "United States." These have been distinguished by main headings in large type, with subdivisions capitalized as if they were main entries.

Inquiries. Questions concerning the manuscript collections described in this series of catalogs should be addressed to the repositories holding them.

Suggestions for the improvement of the catalogs and inquiries concerning participation in the cataloging program should be addressed to Mrs. Arline Custer, Head, Manuscripts Section, Descriptive Cataloging Division, Library of Congress, Washington, D. C. 20540.

Papers of General Andrew Pickens (1739-1817), Revolutionary officer and Indian Commissioner; Andrew Pickens, Jr. (b. 1779), Governor of South Carolina; and Francis Wilkinson Pickens (1806-1869), U. S. Representative from South Carolina, Minister to Russia, and Confederate Governor. The papers of General Pickens relate to the Revolutionary War in South Carolina and to Indian affairs, especially treaty negotiations with Southern tribes. 13 papers (1812-26) are of Andrew Pickens, Jr. The correspondence and other papers of Francis W. Pickens form the bulk of the collection and include letters of Pierce M. Butler, James H. Hammond, and John P. Richardson, business papers relating to the sale of cotton and plantation supplies, account books, scrapbook, and notebook. Many of Pickens' letters written to members of his family discuss plantation affairs, family and social life. The letters to his brother-in-law, James Edward Calhoun, contain frequent comments on political topics, especially those affecting John C. Calhoun. Correspondence (1855-99) is chiefly that of Pickens' wife Lucy (Holcombe) Pickens with her family and friends.
